Call us today to learn more about our experience and
how we can work with you to make the most of your technology.

Keep your technology working for you...

Work with us.

We're the bridge between technology and business.

Just as Microsoft invests in its products to make them more and more reliable and scalable for businesses, it also ensures that the best partners in the industry are prepared to deliver the technology solutions businesses need most.

As a Microsoft Certified Partner, we have the knowledge, skills and commitment to help you implement solutions that match your exact business needs. We'll help you turn effective technology into a competitive advantage.

Technology is the foundation of many of today's vital business functions. It helps you with employee communication and collaboration, it aids your partnerships with other businesses and it helps you reach out to your customers. But technology evolves and changes quickly, challenging even the most astute business to retain the right IT staff, with the right skill set.

Choose a technology partner you can depend on.

When your technology needs arise, we know that finding the right expertise can be a real challenge. You may ask yourself the following questions:

- Is my internal IT department strictly accountable to a budget and timeline?
- If I hire people for new IT projects, will I need these people after the project is complete?
- Will my IT staff need to be trained in order to complete the next IT project? How much will that cost me in time and dollars?
- Has reliability and compatibility been an issue in my past customized application projects?

Get your solution from a Microsoft Certified Partner. We share the risk with you, from budget accountability to project completion timelines. We're only on your team when you need us, so you don't have to pay a full-time employee salary over the long term. We are accomplished at the newest technologies when we walk through your door, so don't need to "learn on the job"—which minimizes your time to market and maximizes your ROI in Microsoft technology.

And as a Microsoft Certified Partner, any Microsoft Certified applications have passed rigorous compatibility and reliability tests to ensure they meet the highest performance standards and are proven in a real-world environment.

Rely on a Microsoft Certified Partner to help you with many of your business technology needs.

We can help you:

- Connect with customers through e-commerce or e-CRM systems.
- Empower your employees with mobile communication and project collaboration capabilities, corporate portals, and more.
- Build an e-business infrastructure from systems architecture to deployment to management.
- Integrate with business partners, deploying buy-side, B2B supplier enablement, and more.
- Provide vertical solutions such as Web and application hosting and billing/customer care systems.

Contact us today to get a complete description of our offerings, and to learn more about how we can help you implement your next project.

Make the most of working with a Microsoft Certified Partner. You can rely on us as an 'advisor' or 'implementer' on your projects—to augment your existing IT staff with specific skills to implement changes and new solutions. With our know-how on Microsoft technology, we can train your staff on proven project deployment processes. Your staff gains valuable new knowledge and expertise.

Microsoft Certified Partners are backed, trained and supported by Microsoft.

- Exclusive technical support
- Special product training opportunities
- Pre-releases of Microsoft business products
- Monthly updates on new products and solutions

A Microsoft Certified Partner maintains Microsoft certification of its people and products to sustain membership.

Microsoft Certified Professionals (MCPs) have hands-on experience and early exposure and support to Microsoft products, passing rigorous exams, including, Microsoft Certified Systems Engineer and Microsoft Certified Solution Developer designations. Microsoft Certified Partners

have at least two MCP's on staff at all times to maintain their membership status or one software product that passes one of the qualifying Certified Partner product tests.

Software that is Microsoft Windows Certified or Microsoft Windows Compatible means that the Microsoft Certified Partner's product has passed independent lab testing.
